Laboratory Environmental Policy

The university's responsibility in establishing a sustainably managed green university that is safe and friendly while doing our part in protecting the earth and environment upholds the spirit of sustainable operations and philosophy of social responsibility. The waste prevention of gas, water, and toxic waste in our laboratories must meet environmental standards to create a premium learning environment that is healthy, compassionate, innovative, and excellent.

To meet these goals
We promise

Principle: Abide by laws and establish a safe, sanitary, and green campus environment

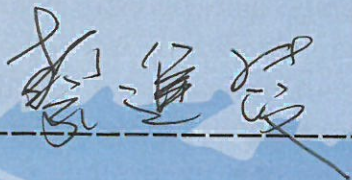

Requests: Prevent risk and realize public safety policies

Strategy: Continuous improvement and promotion of autonomous management

Actions: Emphasize education and promote mechanisms that facilitate communication

Philosophy: Compassion towards life, build a safe and healthy work environment
